

how to make a pinwheel

Supplies: paper; pencil with eraser; a small bead; a straight pin; and scissors

Decorate the paper with markers, crayons or watercolor paints. Cut along the dotted lines.

Fold every other corner inward and poke the pin through the dots on each corner, then through the center. On the back of the wheel, thread bead through the pin and sink the pin point into the pencil eraser. Give it a spin!

Parents, use #sharetheplay on social media so we can see how they did!
